## STANDARD EQUINE HEALTH INFORMATION

It is recommended that all horses stabling on the TERRANOVA EQUESTRIAN CENTER grounds arrive between 8 a.m. and 5 p.m. If it is necessary to arrive at any other time, please contact the show office before arrival.

TERRANOVA EQUESTRIAN CENTER management strives to provide an excellent competitive environment. Exhibitors, especially those traveling long distances, can contribute to the healthy environment by following some basic recommendations. Please monitor our website at [www.TerraNovaEquestrian.com](http://www.TerraNovaEquestrian.com) for any additional and possibly mandatory requirements.

- 1) A Statement of Health must be dated by a veterinarian within seven days of arriving at the facility. The certificate must be available to enter the Facility at ALL times.
- 2) A current negative Coggins test. Please renew before it expires, not just before it is necessary to leave the state. It is strongly recommended that all horses be vaccinated for Equine EHV-1 (either modified live or killed vaccine) no sooner than seven days prior and no later than 180 days prior to entering the show grounds. Most EHV-1 vaccines are only considered effective for 180 days. Check with your veterinarian about which vaccine you use.
- 3) Statement of Health must be signed by a licensed veterinarian within seven days of the first arrival at TERRANOVA EQUESTRIAN CENTER, documenting that the horse has:
  - a. Received regular and consistent vaccination against Equine Influenza and EHV 1 & 4, with the most recent booster being within 180 days and not within seven days. This will be in accordance with USEF GR845.
  - b. Not shown symptoms of or been treated for EHV-4/1 within the past 28 days.
  - c. Not been at a facility under quarantine for EHV-4/1 or exposed to any horses showing symptoms of EHV-4/1 within the past 28 days.
  - d. Once the horse leaves the facility, you will be required to show a new Statement of Health upon returning to the facility.
- 4) Current vaccination against WNV, EEE, WEE, Tetanus and Rabies is strongly recommended.

1301 6TH AVE W, 3RD FLOOR, BRADENTON, FL 34205

5) You should document your horses' normal temperature before arrival. Please do not ship horses with elevated temperatures.

It is recommended that you establish a log of temperatures taken at least twice daily. If there is an elevated temperature for more than 24 hours, please consult your local veterinarian immediately.

6) Every effort should be made to minimize stress and commingling of horses shipped long distances. Extra hours on a horse van or moving from stable to stable is the fastest way to compromise your horses' and your neighbors' horses' health.

7) Any horse on the show grounds with a fever of unknown or suspicious origin must be reported to TERRANOVA EQUESTRIAN CENTER Management. It is always better to err on the side of safety. Isolation stalls will either be available on the grounds or at a local veterinary practice if the need arises.

8) Please take the time to review equine good hygiene practices and impress its importance to your groom in routine care.
